Education

Vellore Institute of Technology

Integrated M.Tech in Artificial Intelligence (CS Equivalent)

Jul 2022 – Jun 2027

CGPA: 8.98/10.0

Technical Skills

Core Languages: Python, Java, C/C++, SQL, TypeScript

Systems, Cloud & Databases: AWS, Docker, Linux Environments, PostgreSQL, DynamoDB

Software Practices: Software Engineering, Agile, SDLC, STLC, CI/CD, Unit-Testing, OOPs Concepts

Domain Expertise: Data Structures, Performance Optimizations, Database Security (RLS), Applied AI

Work Experience

Sportosphere Services Pvt. Ltd. (SportsNaukri.com)

Nov 2025 – Apr 2026

Intern - Systems Architecture & Innovation

New Delhi (Hybrid)

- Engineered a PostgreSQL backend on Linux, collaborating with cross-functional teams to configure Row Level Security for 100% data isolation.
- Directed Agile sprints and presented technical documentation to stakeholders, ensuring SDLC compliance and eliminating runtime memory errors.
- Launched a 12,000-line notification microservice, mentoring peers on STLC-compliant unit-testing workflows to achieve zero-downtime production releases.

Flamboyant Technologies Pvt. Ltd.

Oct 2025 – Dec 2025

Software Engineer Intern

Noida, Uttar Pradesh

- Accelerated cloud application search speeds, cutting latency by **94%** (800ms → 45ms) by communicating optimized execution plans to engineers.
- Minimized server compute load and First Contentful Paint by **66%** by partnering with developers to restructure data serialization logic.
- Owned the automation of Linux infrastructure provisioning scripts, reducing operational overhead by **35%** and advancing weekly release cycles.

Projects

Project Synapse (AI-Native Distributed System)

Jul 2025 – Aug 2025

Python, C++ Concepts, Linux OS Interactions, Docker

[GitHub](#)

- Architected a distributed Multi-Agent System coordinating **17 software tools**, eliminating manual intervention in logic resolution workflows.
- Boosted anomaly detection speed by **40%** incorporating Graph Data Structures to map and evaluate agent decision trees.
- Standardized execution environments using Docker, minimizing onboarding time for new team members and ensuring cross-platform consistency.

Recipe-AI (Cloud Platform & Telemetry)

Aug 2025 – Sep 2025

AWS, Applied AI, Performance Optimizations

[GitHub](#)

- Designed a serverless AWS pipeline evaluating video streams, expanding platform capacity to process 1,000 media files daily.
- Slashed cloud compute overhead by **70%** applying optimized resource allocation algorithms during image processing operations.
- Built a NoSQL metadata schema in DynamoDB achieving **sub-10ms** retrieval latency, preventing database bottlenecks during peak traffic.

Asset-Advantage (High-Performance Analytics)

Feb 2024 – May 2024

Python, Vectorization, System Profiling

[GitHub](#)

- Leveraged NumPy vectorization optimizing memory access patterns, reducing the execution time of analytics scripts by **30%**.
- Synthesized **50,000 financial records** via Python ETL pipelines, enhancing predictive forecasting accuracy by **25%** for executive stakeholder review.

Achievements & Leadership

- Zafin Aspire & Achieve Scholar** (2026): Selected globally as 1 of 8 recipients for this highly competitive merit-based STEM scholarship, recognized for academic excellence, technical innovation in AI, and leadership across rigorous interview rounds.
- Reliance Foundation Scholar & EY Scholarship Finalist** (2022 – Present): Secured national placements from 5,000+ applicants modeling technical business solutions and maintaining an 8.98 CGPA.
- Community Volunteer** (2022 – Present): Coordinated logistics for regional outreach programs alongside local organizations to execute recurring public service initiatives.

Certifications

- AWS Certified Solutions Architect - Associate** (Apr 2026) | Score: 940/1000 [AWS](#)
- Oracle Cloud Infrastructure 2025 Generative AI Professional** (Aug 2025) [OCI](#)
