PROFESSIONAL SUMMARY

Dynamic, adaptable, and detail-oriented; thrive in collaborative environments, embrace challenges with curiosity and integrity, and bring a positive, growth-driven mindset to every opportunity.

EDUCATION

• **Integrated Master of Technology in Computer Science and Engineering(Artificial Intelligence)** 2022-27
VIT Bhopal University CGPA: 9.04

PROJECTS

• **AgroHealth Analyzer** Jun 2024 - Apr 2025
A modular IoT and AI system for real-time plant disease detection and management.

- Achieved 93% classification accuracy across 107 plant disease categories using an ensemble CNN model deployed with TinyML on ESP32-CAM, reducing false positives by 19%.
- Automated image preprocessing and cloud upload, cutting bandwidth usage by 82% and response time by 60%; delivered actionable insights with explainable AI via Streamlit dashboard.
- **Technology Used:** TensorFlow/Keras, TinyML, ESP32-CAM, Ultrasonic Sensors, Streamlit, Gemini AI, GCP Storage

• **Data-Driven Innovations in Supply Chain Management** Apr - Jun 2024
Developed Qlik Sense dashboards to monitor supply chain KPIs and improve decision-making.

- Automated data integration from multiple sources, reducing manual data entry by 60%.
- Enabled real-time analytics and visualization, leading to a 30% improvement in process efficiency.
- **Technology Used:** Qlik Sense, Excel, Data Analytics, Dashboarding

• **Asset-Advantage (Finance Visualizer)** Feb - May 2024
Built a financial analytics platform for real-time expense tracking, forecasting, and visualization.

- Engineered ETL pipelines and automated data cleaning, reducing manual reporting time by 40%.
- Integrated machine learning models for predictive analytics, improving budget forecasting accuracy by 25%.
- **Technology Used:** Python, React.js, Node.js, MongoDB, Regression.js, Data Visualization, Machine Learning

WORK EXPERIENCE

• **Google Cloud Skills Boost Virtual Internship** July - Sep 2024
SmartInternz Online

- Deployed and managed 10+ virtual machines and cloud storage buckets using Google Cloud Platform (GCP), supporting scalable application workloads.
- Automated infrastructure provisioning with gcloud CLI and Cloud Shell, reducing deployment time by 35%.
- Implemented IAM roles and VPC networking, enhancing cloud security and compliance for all test environments.

• **Qlik (Business Analyst) Virtual Internship** Apr - Jun 2024
SmartInternz Online

- Built 5+ interactive dashboards in Qlik Sense, streamlining KPI reporting and improving stakeholder decision-making efficiency by 25%.
- Performed data cleaning and transformation on datasets of 10,000+ records, automating ETL processes and reducing manual reporting time by 30%.
- Leveraged Qlik AutoML for predictive analytics, increasing accuracy of supply chain forecasts by 20%.

TECHNICAL SKILLS

Programming : Python, Java, C++, JavaScript, SQL

Cloud : Google Cloud Platform, Oracle Cloud

Data Analysis : Qlik Sense, Streamlit, Recharts, Power BI, Fabric

Databases : Oracle Database, MongoDB, MySQL, BigQueryML

AI/ML : TensorFlow, Keras, Scikit-learn, Applied Machine Learning, Regression, Oracle AI Vector Search, TinyML

Interests : FinTech, Supply Chain Analytics, Cloud-Native, Modular & User-Centric Design

ACHIEVEMENTS

- Reliance Foundation Undergraduate Scholarship**
Selected among 5,000 students nationwide for academic excellence and leadership. 2022
- EY Scholarship Finalist**
Finalist in the EY Scholarship Program 2024–25 for business and innovation skills. 2024

CERTIFICATIONS

- Oracle APEX Cloud Certified Developer Professional**
Oracle May 2025 – Present
- Oracle AI Vector Search Certified Professional**
Oracle May 2025 – May 2027
- Google Cloud Computing Foundations Certificate**
Google Aug 2024 – Present
- Cloud Computing**
NPTEL May 2024 – Present
- Qlik Sense Business Analyst Badge**
Qlik May 2024 – Present
- Applied Machine Learning in Python**
Coursera Dec 2023 – Present
- Python**
GUVI Geek Networks, IITM Research Park Aug 2023 – Present
